They are the Biggest Little Books Ever Published

If you are learning to sing, or play the piano, organ, violin, cornet, clarinet, flute, trombone or any other musical instrument, these books are almost an absolute necessity, for they will save you hours and hours of study.

Mere words do not convey their importance as an asset to both teacher and pupil, they must be seen to be appreciated.

Stepping Stones to Music-Land

FIRST TWO VOLUMES NOW READY

Easy Progressive Foundation Material For the Piano

In Four Parts by Katharine Garratt Skinner

These books are the quintessence of simplicity, originality and charm combined. Those contemplating the study of music never had such a splendid opportunity to delve into the mysteries of the keyboard with so little effort. Beginning with the staff the composer systematically takes the pupil in a whimsical manner through the entire system of notation. That the text may be the more quickly understood, the pages are replete with picture cuts and half tones. Nothing of a like nature on the market. Appropriate for kindergartens, class work or private tuition.

Piano Exercises for Developing the Fingers
By LOUIS STILLMAN

In order to become an accomplished pianist it is necessary to have perfect control over the muscles of the fingers. The exercises contained here have been constructed mainly for that purpose, and if systematically practiced cannot help but bring the necessary result. The work faithfully lives up to its title, for it has a mental and muscular influence on the mind and fingers which encourages confidence and ease in playing in any key and scale.

A Practical Piano Course for Beginners

By EDUARD HOLST

A systematic course of instruction of a diversifying type. It starts the pupils at the very beginning and leads them, step by step, with proper graduality, to the easy third grade.

Although a teacher of long experience, Mr. Holst realized when he began his task of compiling this book that his was no easy one, considering the many excellent volumes on the same subject already published. So after accumulating all the possible material he could find, he carefully sifted the useful from the useless, and being benefited by the mistakes of his predecessors, succeeded finally in finishing the most concise work, from the beginner's point of view, on the market.

A recreative melody at every opportunity rather than a tedious exercise has been inserted, making the interest doubly strong.

A thoroughly reliable work, easily comprehended. Don't decide upon your course of instruction until you have seen this one.

FINGER PRACTICE

In Three Volumes
By RAFAEL SAUMELL

The product of practical experience and the only work with its laudable mission on the market, i. e., to give the muscles of each finger the necessary agility to properly execute all intricate passages with apparent ease.

The flattering testimonials received from pedagogic authorities prove that these books are destined to become thumb-marked volumes in every ambitious student's library.

How to Strike the Keys of the Piano

By J. ALFRED JOHNSTONE

In order to become a proficient pianist the principles and practice of technic must be thoroughly mastered, but in order to accomplish this the finger muscles have to be properly developed, that they may be made to STRIKE the keys according to the will of the performer.

This work contains no note exercises, being practically an essay on the fingers, dealing directly upon all points needed for the acquirement of correct finger and wrist technic.

What the dictionary is to your library, this work is to your music room.

Phrasing in Piano Playing

An Elementary Guide with Examples

By J. ALFRED JOHNSTONE

The object of this work is to tell in the clearest and simplest way how piano music should be phrased, particularly that branch which treats of the articulation of music from a constructive and punctuating point of view. The volume also contains an outline of some common forms of music, treats of musical sentences and their right phrasing, how to distinguish the various uses of the slur, etc.

Violin Technic Simplified

Based upon mental control and change of positions
A new system for Perfecting Intonation
By LEO C. BRYANT, Pupil of Goby Eberhardt and Merrick B. Hilderbrandt

In this work, the author, giving the public the benefit of his many years experience as a practical teacher and student, proves conclusively that the quickest method of acquiring a perfect violin technic, is, not in exhausting one's entire strength on tedious études, but rather by concentrating the mind on the muscular development of the individual fingers, as each finger has a special task to perform, it must be trained accordingly, in order to do its part thoroughly.

That the description of the gymnastic exercises may be easily comprehended, illustrations taken from life-photographs are interspersed throughout.

This is the most remarkable Music Book proposition ever offered to the music loving public, for in addition to their contents being made up of universally famous compositions, each volume has a beautifully tinted life-like autographed portrait of a musical celebrity, together with a brief story of his interesting career.

Each piece has been especially edited for this series, and the printing, paper and binding beggars description.
